Kontech®

The Professional Difference

Kontech Floor Standing Display is a standalone digital signage player with compact design and content management software. It features also a sleek design, solid construction and a content scheduler. Touch screen can effectively offer customers a wonderful interaction, really ideal for shopping malls, retail, recreation, airport and other places need AD display.

About us

Kontech, established in 2007, located in an innovative city of Shenzhen, China.
We are a system integrated application provider based on intelligent display.
The main products of our company include Commercial display and Professional TVs, such as digital signage, open frame, kiosk, video wall, Magic Mirror, stretch display, transparent showcase and some TV products.
We value technological innovation and 15% of our annual values are invested in product development. Our product passed UL, CE, CB, FCC, FDA, ROHS and other qualifications and won more than 50 patented technologies, while we continue to promote the development and functional upgrade of intelligent displays.
With more than 10 years of experience, Kontech deeply working in the market and formed a powerful "resource integration ability", which can provide customers with one-stop service to meet their custom-made needs. In the future, Kontech Electronics will steadily enter the world market and become the leading brand of commercial display and intelligent display.

ROYAL HOUSE

Fashion design

Apple style
Ultra–thin fuselage
Metal frame

Build-in camera

With camera, some senior functions can be realized, such as face recognition, photo taking etc.

Wonderful visual enjoyment

Brightness: 350nits
Resolution: 1920*1080/3840*2160
Wide viewing angle:178° /178°

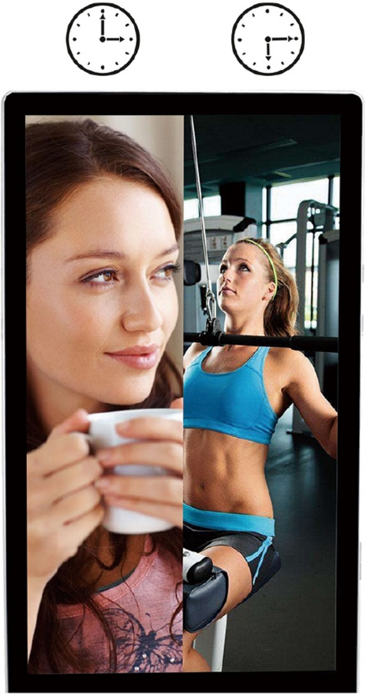
The resolution of this digital signage is up to 4K UHD. Its brightness is about twice that of ordinary home TV. Wide viewing angle ensures that you can enjoy the displayed contents in any angles.

Shocking sound quality

Two high quality speakers at 2x8W are build−in for a better auditory experience.

Support dual system

Two kinds of operating systems are available: Android and Windows. You can choose the best one you like. In addition, our floor standing display product also supports dual system.



Support timing function

Timing function allows you to display different contents in different times according to the settings you did in advance. It makes it become easier to change advertisements and can effectively save your time.

Mobile phone
PC

Remotely control

This digital signage has built-in the professional advertising software. It enables you to change or release the information via PC or Mobile phone remotely. In addition, various poster models are available so that you can easily design the advertising posters.

Amlogic
ARM Cortex-A53

New crafts to create ultra-low power consumption

We adopt the new type LED machining assembly line and unique Intelligent master chip, which can effectively reduce power consumption and costs.

Print

QR Code

NFC

Extended functions

Some extended functions are available to meet various needs, such as Print, QR code, NFC etc.

Applications

shopping malls, retail, recreation, airport and other places need AD display
