We have a team of experienced R&D and production, focusing on the current customer's "focus on integration + focus on customization" business model, and strive to provide customers with more and more made-to-order products. We are committed to the development of high-quality products and services, and we are looking forward to continuously meeting your needs.

? About us

? Touch screen displable

Touch screen technology known as a tactile or touch screen frame, is a transparent panel that is placed on the front of a display screen. The touch screen panel detects touch and interprets that as an input. Touch screen technology is used in many applications, including smartphones, tablets.

? Display in horizontal and vertical direction

Considering the requirements of horizontal display and vertical display, we can provide the corresponding products for clients which also meet The trend of design trends for horizontal and vertical.

?HD display effect

To make impact! Apple, iOS and Android display support 4K (3840*2160), Microsoft, UHD (4K) and Full HD (1920*1080) high-definition and ultra-high-quality display.

? Fashionable apple style design

Adopting aluminum alloy material, which ensures the strength of the product and the beauty of the appearance, with a smooth surface that absorbs the capacitive sensing signal, which ensures the sensitivity and accuracy of the touch screen.

? Support for Miracast function

The Miracast function allows both widget interaction. It is offered by Android 4.2 and later versions. It allows you to use the corporate display on wireless network without the signal cable.

? Extended functions

Some extended functions are available to meet various needs, such as NFC, QR code, APP, etc.

Print | QR Code | NFC

? Build-in camera

With camera, some special functions can be realized, such as face recognition, auto-focusing etc.

? High quality speakers

Equipped with high-quality speakers, the sound is clear and powerful, which can be a high-quality speaker with the volume control, and it can be used as a sound system in a meeting.

? Remote control

BT | Wireless Dongle

The user-friendly remote control, the BT or the wireless dongle, can be used to control the display, such as switching the signal source, adjusting the volume, and adjusting the brightness, etc. It is convenient and fast.

? Support dual system

The mode of operating system is not available. Android and Windows systems are optional. Android 7.1, 8.0, 9.0, 10.0 and 11.0 are optional. Windows system only supports 32 bit system.
